

ThermaDog-TL2

System for Real-time **Temperature and location monitoring** to ensure efficient operations in Milk tankers and PUF panel trucks.

- 1 Do you want to avoid milk spoilage caused by human error, power failures, or equipment issues during transportation?
- 2 Do you want to ensure on-time delivery of your goods?
- 3 Do you want peace of mind by being able to remotely monitor the condition of the milk in real time from anywhere in the world?
- 4 Do you want to access the complete temperature history of the milk for regulatory compliance, or to build customer confidence?

ThermaDog meets all of these needs. It is a robust device for remote monitoring of **temperature and location** in real-time, ensuring the safety and quality of milk during transportation.

★ KEY FEATURES

Instant notifications

Get following SMS and email notifications instantly:

1. High temperature.
2. Low temperature.
3. Compressor not switched on yet or compressor failure.
4. shipment about to delay.
5. Power failure.

Real-time Tracking

ThermaDog records the milk's temperature and location and sends the data to our app every 5 minutes.

Access Data Anytime

Access following historic data in pdf and graphical formats from the app:

1. Temperature data.
2. Compressor switch on and off data.
3. Notifications.
4. Milk loading time & more.

This is a patent-pending technology developed by engineers from **IITs and NITs** in our **award-winning company**. We use **RTD PT100 class A** sensors to ensure the highest level of temperature accuracy.

Secure **API integration** for device data transfer to your software.

1 year warranty followed by AMC service and prompt support.

Compliant with **FDA's 21 CFR Part 11**

Customized features & Flexible pricing: Pay per use

Calibration certificate from an NABL accredited laboratory can be provided.

TECHNICAL SPECIFICATIONS

Temperature Sensing	-100°C to +300 °C , ± 0.5 °C
Location accuracy	20 mtrs
Dimensions (L x W x H)	122 x 73 x 40 mm
Weight	200g
Battery Backup	10 days at 25 deg C when data interval is configured to be 15 mins.

INTECOG is the Trusted Partner for all your Asset condition monitoring needs.
Sleep peacefully while **ThermaDog** saves your milk, money, time and reputation.
